Very clear explanation. and he provides intuition for every theory he discusses

Review lecture before ~~the~~ explaining the homework which has been very helpful for my understanding of the course.

Clarity in explanation of concepts is much appreciated.

It is good if he can provide some extra classes on fundamentals of finance which is needed

The background material covered before solving the P.S. was useful.

Assignment feedback would be better if it was submitted & handed back with comments as per ~~the~~ the question

The teacher does a great job reviewing the material and main topics of the class. I found his classes even more helpful to understand the course material as the lectures themselves.

The teacher is very nice and kind and helpful. He's also very clear about the content and solving process of the exercise. I like his teaching style very much.

Very clear and good explanations.  
 Not only went through the questions but also  
 through repeated some of material from lectures,  
 which I found useful

~~It was~~

More ~~to~~ concise in lecture material could  
 be better

+ very good summary of discussed topics (from lectures)  
 given at the start of the classes

+ broad view on the whole topic of fin. risk

John works hard to make sure everyone is following him.  
 He should explain ~~use~~ some basic concepts before each  
 question.

very clear explanation of the class material & questions.

Very engaging & involves class a lot

Could the teacher provide the excel format for the class exercises ?

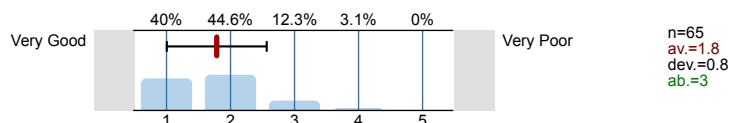

Clear explanations, many angles to approach same problem - quite useful in enhancing understanding.

Very clear regarding course material and communicates knowledge well

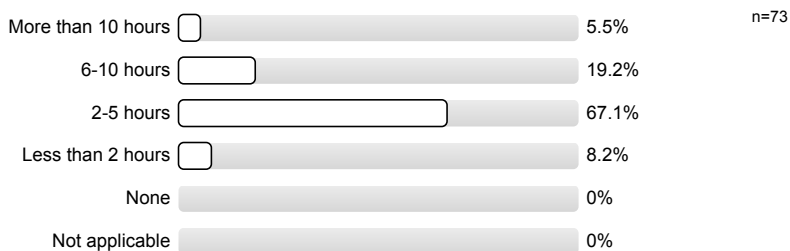

Clearly explains the topics and logics involved.  
Great experience with Mr. Kuong.

Prof. should allocate more time for this course  
of his

Probably some support sessions for students who don't have a background in Finance.  
A little in-depth coverage of a few topics would have been more insightful

If coursework was graded it could help in motivating people to participate more.

The course is very interesting and the classes are really useful. Maybe get ~~more~~ feedback from the assessed works.

I think ~~if~~ there are more interesting case studies like LTCM the students will get more involved.

- more time for classes (50min is too short for such an interesting topic)

Better feedback on submitted coursework.

The lecture slides are not very clear. We have to resort too much to internet searches on our own.

Great course, except for one point. The seminars are too short. Either, seminars need to be at least 1.5 hours, or have two seminars ~~on each~~ each week. There's no time to discuss anything else than the study questions.

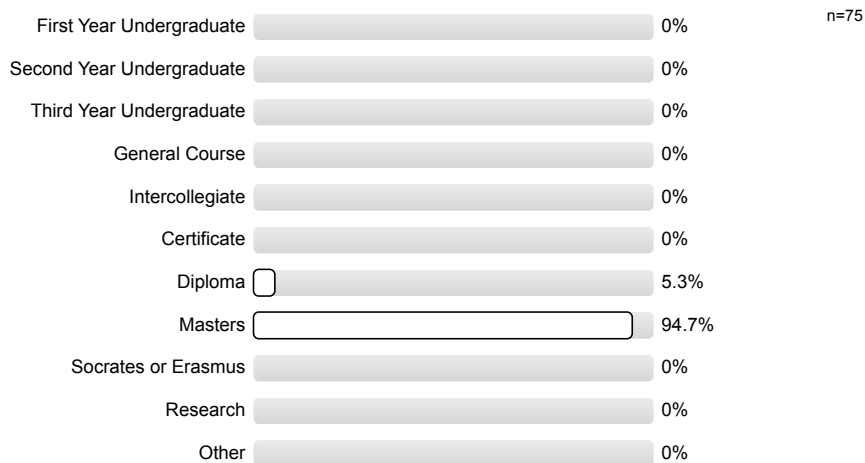

Could the professor be slower down a little?

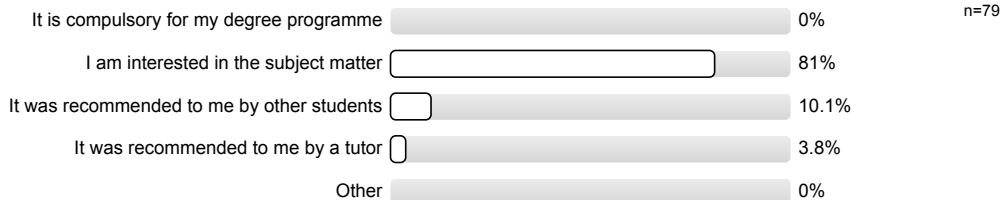

Lectures not particularly stimulating  
 More problem solving in lectures instead of focus on  
 theory would be very helpful.
